

MUFG Green Bonds Reporting

Issuance date 1/10/2019

Use of Proceeds

Allocation of Funds (as of the end of March 2024)

The aggregate amount of loans outstanding as of March 29, 2024 to Eligible Green Projects that were funded by the net proceeds from the sale of the MUFG Green Bonds issued in October 2019, was US\$90 million (for a total of 5 projects). By type of electricity generation project, solar photovoltaic power and wind power (onshore) accounted for 75% and 24%, respectively. In terms of geographical distribution, Japan represented the largest portion, followed by Malaysia. (See the charts below for details for your reference.)
